

TEMPERATURE ALARM

JAN 23, 2022 - Gizmo Engineering's temperature alarm shows the tank temperature with the digital display and if the the temperature ever gets out of range you set, it produces a loud alarm. The alarm is a 103dB buzzer and stack light. Temperature status-is shown with the green or red stack light.

In addition, the temperature alarm includes a relay output to either shut off equipment with the relay, or communicate temperature events. All of this in a compact and economical package.

Features:

- Easy to set and operate.
- Waterproof. Suitable for wash down duty.
- Convenient front button silences the buzzer.
- Buzzer snooze alarm sounds again in 30 minutes if temperature not correct.
- Relay output (15A).
- Thermocouple included.
- Thermowell included.
- RS485 output included for temperature monitoring.
- Compact enclosure is only 6x6"
