

pH CONTROLLER WITH ALARM

A first-of-kind pH controller that alarms *when pH is out of range!* Not just an “output” that needs considerable wiring work to actually produce a useful alarm, but ready out-of-the-box. LED stack light indicates pH in, or out of range, or when the pumps are active. Perfect for waste treatment where upsets are time sensitive.

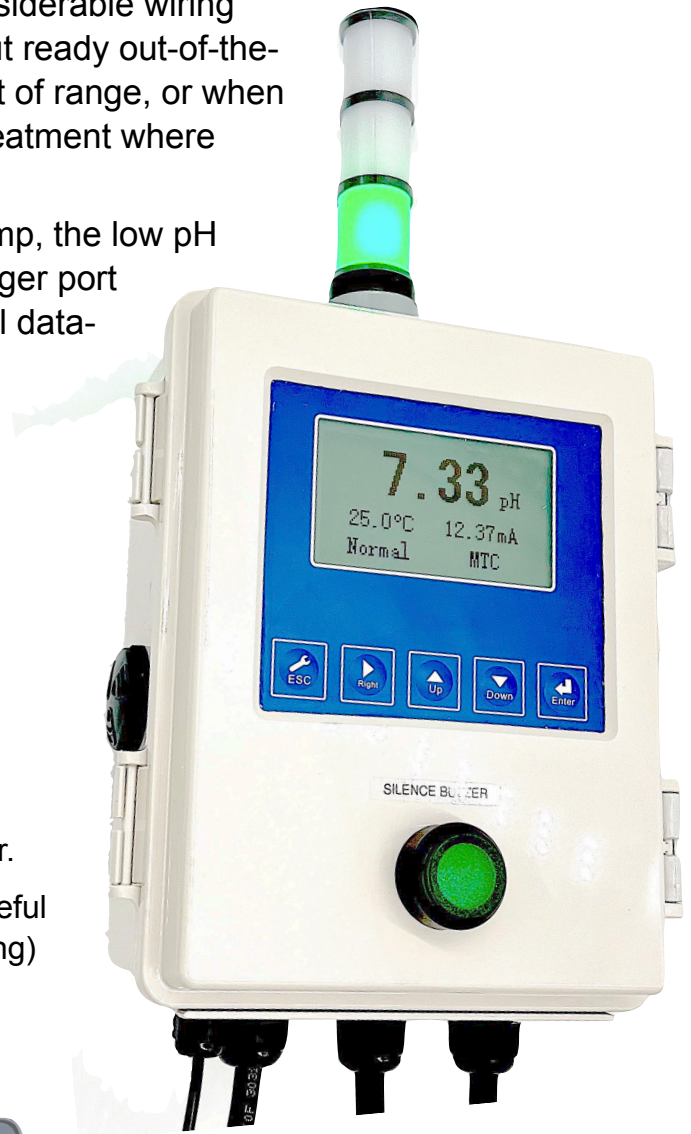

Separate control points for the high pH pump, the low pH pump, high alarm and low alarm. Data-logger port is built-in so its ready to plug in the optional data-logger.

PLUG-IN LOGGER

Features:

- Easy to set up, operate and calibrate.
- Convenient front button silences the buzzer.
- Convenient buttons to force pumps on. (useful for pump calibration, priming, drum emptying)
- Waterproof. Suitable for wash down duty.
- *Simple* instructions by video and print with images- no complicated instructions.
- WIFI notifications by email or text. (optional)
- 4-20mA output.
- RS485 output included.

MODEL pH-1
