

TANK LEVEL ALARM

Tank level alarm with a loud buzzer and flashing LED. Battery powered.

Can be installed in minutes with no wiring. Just connect the battery. Polypropylene pipe and float switch.

OPERATION

When liquid level changes the float position, the buzzer sounds and LED flashes. Pressing the button silences the buzzer while LED continues to flash. After 30 minutes the buzzer sounds again if the level condition not corrected. (this is the default operating mode, other modes are field-selectable)

FEATURES

- Waterproof. Suitable for wash down duty and outdoor use. IP65.
- Built-in float guard protects the float switch for rough use.
- Bright flashing beacon.
- Loud buzzer is 103dB.
- Different behavior modes are selectable in the field using DIP switches in the box.
- 10-year lithium battery lasts for years and has a low battery alert.

OPTIONS

Line powered, relay output, custom configurations, also available in PVDF or 316 stainless.
