

# IBC HIGH LEVEL ALARM

Sounds an alarm when high level with a loud buzzer and flashing LED.

Rugged liquid level alarms for IBC tanks that can be installed in a minute with no wiring.

## OPERATION

When liquid level goes high, a LOUD buzzer sounds and LED flashes. Pressing the button silences the buzzer while the LED continues to flash.(this is the default behavior other behaviors are field-selectable)

## FEATURES

- Lithium battery included lasts for years and has a 10-year standby life.
- Waterproof. Suitable for wash down duty and outdoor use.
- Built-in float guard protects the float switch for rough use.
- Many other behavior modes are selectable in the field using switches located inside the box. (repeating alarm, button turns off buzzer and LED for tank filling,, etc)
- Lithium battery is replaceable in the field. Lasts for years. Low battery alert.

## OPTIONS

Relay output, cam-lock liquid connection, PVDF or SS material, wireless, custom configurations.
