

# HEIGHT BAR ALARM

Emits loud siren and flashing red light if struck, which allows a driver to stop before hitting an obstruction

Height Clearance Bar Alarm protects overhead assets and vehicles from damage. Designed for easy installation, this clearance bar warning system helps prevent costly damage from accidental strikes, providing both audible and visual alerts to warn forklift drivers *before* damage occurs.

- Easy installation - slips onto a common PVC pipe.
- Rugged.
- Waterproof.
- Battery lasts 10 years.
- Loud alarm is 103dB at 2 ft.

Avoid costly repairs to overhead doors, air conditioners, pipes, sprinkler systems, overhead walkways and more with the most durable clearance bar alarm on the market. Learn more about reliable vehicle height detection and overhead clearance safety at:
