

# T6 TIMER - STACK LIGHT

A timer designed from the ground up for corrosive, acid, wet environments. Simple to use as a kitchen timer.

Counts down from the time you set, and when the time elapses, a LOUD warbling buzzer sounds with flashing beacon LED.

To operate, push the green front button to silence the buzzer, which automatically resets the time for the next cycle. Easy to set different times on the fly with the blue buttons.

- Waterproof. Suitable for wash down duty.
- Backlit display with 30 mm digits allows great visibility even in dark areas.
- Two timing ranges: 100 minutes, or 100 hours.
- Many pre-programmed modes are selectable in the field using switches lit the box.
- “Early warning” alert built in.
- Relay output to control devices.
- After the time has elapsed, the display counts up until the alarm is acknowledged.

We will gladly customize it with different color LEDs, auxiliary outputs, 220V power, custom programs, 30A relay output. Call us with your needs!

Ideal for repetitive timing in plating, laboratories, poultry farms, chemical processes, food industry, and more!
