

HEIGHT BAR ALARM

Prevents damage to overhead assets with a loud siren and flashing light. Allows a driver to stop before damage.

Height Clearance Bar Alarm protects overhead assets and vehicles from damage. Designed for easy installation, this clearance bar warning system helps prevent costly damage from accidental strikes, providing both audible and visual alerts to warn forklift drivers *before* damage occurs.

Simply mount the on an existing pipe or bar where it will give a warning before the vehicle strikes the overhead asset. Level the unit using the bubble level and then tighten the thumbscrew. Once the switch is turned on to activate, your assets are protected. The battery is a lifetime battery and has a shelf life of 10 years.

- Easy installation - slips onto any common PVC pipe.
- Rugged.
- Waterproof.
- Battery lasts 10 years.
- Loud alarm is an ear-piercing 115dB at 2 ft.
