

IBC LEVEL ALARM

IBC alarm with loud buzzer and flashing LED.

Rugged liquid level alarms for IBC tanks that can be installed in a minute with no wiring. The float switch is protected inside a pipe so it can't get damaged. If needed, another pipe connects to your feeding pump feed to liquid into, or out of, the IBC. This positions the suction point so it is guaranteed to never draw air.

OPERATION

When liquid level goes high or low, a loud buzzer sounds, and LED flashes. Buzzer can be silenced while the LED continues to flash. (other behaviors are field-selectable)

FEATURES

- Waterproof. Corrosion-proof. Suitable for wash down duty and outdoor use.
- Built-in float guard protects the float switch for rough use.
- Lithium battery lasts for years. Low battery alert. 10-yr standby life.
- Other behavior modes are selectable in the field.
- Many options available to suit any need. (PLC connection, relay output etc.)

WITH CAM-LOCK

WITH FEED PIPE
