

RADAR LEVEL GAGE

PRECISION AND CLARITY. REMOTELY MONITORED.

Instantly see precise tank level readings and monitor from afar. Non-contact design eliminates maintenance and contamination.

VISUAL ALERTS & FEEDBACK

Integrated digital display and distinct status LEDs (Green/Safe, Red/Alarm) for immediate status indication.

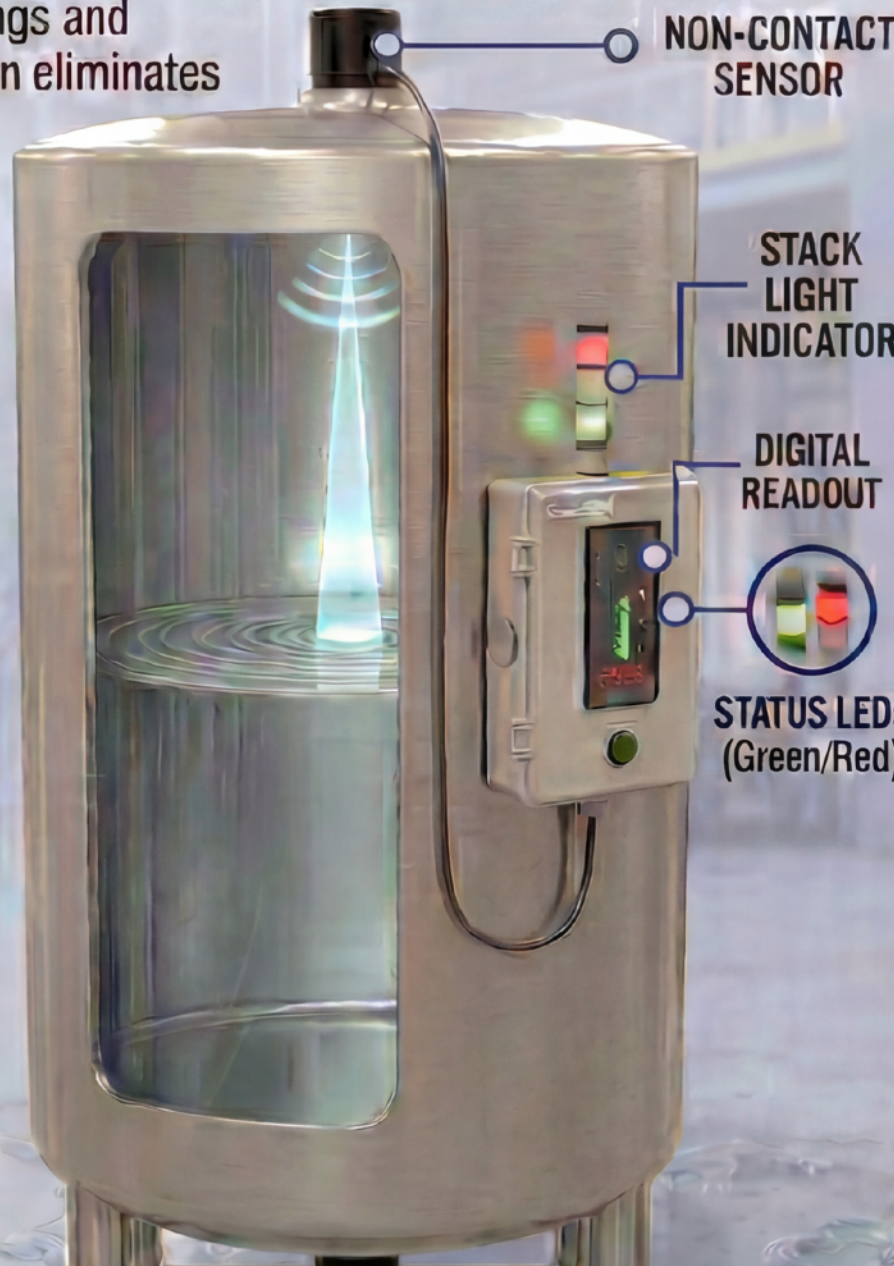

PRECISION RADAR SENSING

Precisely measures liquid level without immersion, suitable for a wide range of liquids, including corrosive or viscous ones.

RUGGED & INDUSTRIAL BUILD

Industrial-grade sensor and NEMA 4X rated controller enclosure ensure long-term, trouble-free operation in harsh environments.

MINIMIZE DOWNTIME

Predict level related maintenance and prevent unexpected outages.

ENSURE ACCURACY

High precision measurement for critical process control and inventory management

LOWER OPERATING COSTS

Reduce manual level checks, prevent spills and optimize usage.

STREAMLINE OPERATIONS

Integrates with control systems, continuous data collection, provides notifications.
