

Drum Level Alarms

Level alarms suited for any size drum, high or low level. Uninterruptible battery power. Many different materials, sizes, options. Also for IBC tanks

Temperature Controller

Controls temperature for operating steam solenoids. Built-in alarm for over-temperature or under-temperature. Simple setup. 4-20 mA output.

Liquid Level Controllers

Liquid level controllers regulate liquid level automatically by controlling a valve or pump. Built-in emergency level alarm.

pH Controller

pH controller will control two pumps. (acid and base) Built-in alarm if pH is out of range. Easy setup. 4-20mA output for data-logging or proportional pumps.

IBC Alarms

Monitor high or low level in IBC tanks. With or without feed pipe. Choice of battery or AC power. Many custom options.

Process Timers

Waterproof process timers. Simple time setting up to to 100 hours. Either battery power or AC power with relay output.

Tank Level Alarms

Easy to install tank level alarms with protected float switches. Any size. Battery or AC power. Many options including float switch or capacitance sensing, relay output, wireless communication.

Level Gage

A digital level gage that gives a continuous readout of the level in a tank- both numerical and bar-graph. Also has 4 alarm outputs that indicate high and low level, or can control the level.
